Privacy Policy

Last updated: October 23, 2026

This Privacy Policy explains how information is handled when you use BrewPath.

BrewPath is operated by **Maksim Shchutski**, a sole proprietor registered in Poland ("we", "us", or "our").

BrewPath is designed to collect as little personal information as reasonably necessary to provide the App.

1. Information BrewPath Handles

Learning progress and preferences

BrewPath stores information about your activity in the App, such as:

- lesson and module progress;
- completed activities;
- streak and progress information;
- Coffee Tree progress;
- saved lessons and dictionary terms;
- Coffee Challenge progress;
- unlocked content;
- App settings and preferences.

This information is used to provide the learning experience and remember your progress.

This data is stored locally on your device and may be synchronized through Apple's iCloud services.

BrewPath does not require you to create an account.

Purchase information

Purchases made in BrewPath are processed through Apple's App Store.

BrewPath uses RevenueCat to manage purchases, restore purchases, and determine which purchased content you are entitled to access.

Because BrewPath does not use user accounts, RevenueCat assigns an anonymous identifier to the App installation. RevenueCat may process limited technical and transaction information required to manage purchases, including App Store purchase and receipt information.

We do not receive or store your full payment-card information.

Crash reports

When the App crashes or hits an error, it sends a crash report to Firebase Crashlytics, a service of Google, so that we can find and fix the problem.

A crash report holds what failed and where in the App, the App version, the device model and operating system version, whether the device is jailbroken, free memory and disk space, screen orientation, whether the App was in the background, and the time.

A crash report carries random installation identifiers that Firebase creates for your installation of BrewPath; they change when you reinstall the App. It carries no name, email address or account, because BrewPath has none. When the App starts, Firebase also receives the App version, the operating system version and the type of network

connection, so that crash reports from one session can be told apart.

Support communications

If you contact us for support or a privacy-related request, we will receive the information you choose to provide, such as your email address and the contents of your message.

We use this information only to respond to your request and resolve the relevant issue.

2. Analytics and Advertising

BrewPath does not use third-party product analytics. Crash reports are described above under Information BrewPath Handles.

BrewPath does not display third-party advertising and does not use your information for cross-app advertising tracking.

If we introduce analytics or other data-processing services in the future, this Privacy Policy will be updated before or when those practices are introduced.

3. Notifications

BrewPath may offer optional reminders, such as daily learning reminders.

These reminders are scheduled locally on your device. BrewPath does not currently operate a server-based push-notification system for these reminders.

You can enable or disable notifications through BrewPath or your device settings.

4. How We Use Information

We use information processed through BrewPath only where necessary to:

- provide the App and its learning features;
- save and synchronize your progress and preferences;
- provide access to purchased content;
- verify and restore purchases;
- maintain the reliability and security of the App;
- find and fix crashes and errors;
- respond to support and privacy requests;
- comply with applicable legal obligations.

5. Third-Party Services

BrewPath currently relies on the following third-party services:

Apple

Apple provides services used by BrewPath, including App Store purchases and, where enabled, iCloud synchronization.

Your use of these Apple services is also subject to Apple's applicable privacy policies and terms.

RevenueCat

RevenueCat provides purchase and entitlement-management infrastructure.

RevenueCat may process anonymous identifiers, technical information, and purchase-related information in order to verify purchases and determine access to purchased BrewPath content.

We do not provide RevenueCat with your name or email address as a BrewPath account identifier because BrewPath currently does not use user accounts.

Firebase Crashlytics

Firebase Crashlytics, a service of Google, receives BrewPath's crash reports so that we can find and fix errors. Google processes them on our behalf, which may happen outside your country of residence.

6. Sharing of Information

We do not sell your personal information.

Information may be processed by service providers such as Apple and RevenueCat where necessary to provide BrewPath's functionality.

We may also disclose information where required by applicable law or a valid legal request.

7. Data Retention

Information stored locally in BrewPath remains on your device until it is removed by you, deleted as part of App data removal, or otherwise removed by the operating system.

Information synchronized through iCloud is subject to your iCloud settings and Apple's applicable data-management practices.

Purchase and entitlement information may be retained for as long as reasonably necessary to verify purchases, restore access to purchased content, maintain transaction records, and comply with applicable legal obligations.

Support correspondence may be retained for as long as reasonably necessary to resolve the relevant request and maintain appropriate records.

Google keeps crash reports for 90 days, after which they are deleted.

8. Your Privacy Rights

Depending on where you live, applicable privacy laws may give you rights concerning your personal information, including rights to:

- request information about personal data relating to you;
- request correction or deletion where applicable;
- object to or restrict certain processing;
- withdraw consent where processing relies on consent;
- lodge a complaint with the competent data-protection authority.

Because BrewPath does not currently use user accounts, much of your learning information is stored on your own device or through your personal iCloud environment rather than in a BrewPath user account.

For privacy-related requests, contact us at: **hi@getbrewpath.com**

9. Children's Privacy

BrewPath is a general-audience educational application about coffee and is not specifically directed to children.

We do not knowingly request personal information from children through user accounts because BrewPath does not currently provide user accounts.

If we become aware that information has been processed in a way that requires additional protections under applicable children's privacy laws, we will take appropriate steps to address it.

10. International Data Processing

Some third-party service providers used by BrewPath may process information outside your country of residence.

Where applicable data-protection law requires safeguards for international transfers, appropriate safeguards are used by us or our service providers.

11. Changes to This Privacy Policy

We may update this Privacy Policy when BrewPath's features, service providers, or data-processing practices change.

When we update the policy, we will change the **Last updated** date shown at the top.

If we introduce functionality that materially changes how personal information is handled, we will update this policy accordingly.

12. Contact

BrewPath is operated by:

Maksim Shchutski
Sole proprietor, Poland
Website: getbrewpath.com
Email: hi@getbrewpath.com

This document describes BrewPath's current release-state privacy practices. It should be updated if analytics, advertising, account functionality, server-side push notifications, or other material data-processing features are introduced.
